SUMMARY

My technical background includes **Python, React, Node.js, SQL, RESTful APIs, and cloud platforms (AWS, GCP)**, enabling me to translate business requirements into scalable, real-world systems.

Experienced in leveraging AI tools such as **OpenAI APIs and Claude Code** to support analysis, automation, and system design.

KEY SKILLS

- Business & System Requirements Analysis
- API Concepts & Data Integration
- SDLC & Agile (Scrum) Methodologies
- Data & System Analysis (Python, SQL, Excel)
- Cloud Data Environments (GCP, AWS)

WORK EXPERIENCE

➤ DATA ANALYST (2023 - NOW)

MerlinBI inc

- Gathered and documented business and system requirements from stakeholders.
- Developed and maintained data reports and analytics to support business decisions.
- Worked with API-based data sources and investigated data inconsistencies.
- Performed root-cause analysis and collaborated with technical teams to improve system reliability and data quality.
- Supported analytics delivery in an Agile/SDLC-based environment.

BUSINESS FINANCIAL ANALYST (2014-2016)

Bank for Investment and Development of Vietnam

- Analyzed business and financial requirements for lending and investment decisions.
- Conducted risk and data analysis on corporate financial statements.
- Acted as a liaison between clients and internal teams to ensure requirement alignment.
